

Concussion Communication Flow Chart

When an athlete suffers a concussion; the athletic trainer will notify the parents via phone and coach via phone/e-mail.

The AT will also notify the athletic director and nurse via e-mail regarding the athlete's name and sign and symptoms the athlete is suffering.

The AT will continue to communicate to the coach, parents and nurse regarding:

- *change in signs and symptoms ~ parents
- * when the athlete's signs and symptoms resolve ~ coach/parents
- *when the athlete takes the ImPact test again, whether they pass/fail ~ coach/parents
- *when the athlete begins the return-to-play protocol ~ coach/parents
- * when the athlete is cleared for athletics ~ coach/parents/nurse

The Nurse will contact teachers when the athlete is cleared and no longer in need of special accommodations.

If an athlete suffers prolonged effects from suffering a concussion; they may be put on a temp 504 plan.
