

Name \_\_\_\_\_

1.  $679 \div 8 =$

2.  $8,225 \div 5 =$

3.  $345 \div 7 =$

4.  $3,996 \div 3 =$

5.  $228 \div 4 =$

6. Lily baked 295 cupcakes for the convention. If she can put 5 cupcakes in one box, how many boxes does Lily need?
7. Bob has 1,224 squares. There is an equal number of squares that are 6 different colors. How many squares are each color?
8. Grandpa Joe has \$256. If he gives each of his 8 grandchildren the same amount of money, how much does each grandchild get?
9. There are 4 friends. They shared 36 pieces of pizza equally. How many pieces does each friend get?
10. The plant nursery grew 3,496 marigolds. If they sell the marigolds in packs of 4, how many packs of 4 can they sell?

Name Key

1.  $679 \div 8 =$

$$\begin{array}{r} 84 R7 \\ 8 \overline{) 679} \\ \underline{64} \phantom{0} \\ 39 \\ \underline{32} \\ 7 \end{array}$$

2.  $8,225 \div 5 = 1,645$

3.  $345 \div 7 =$

$$\begin{array}{r} 49 R2 \\ 7 \overline{) 345} \\ \underline{28} \phantom{0} \\ 65 \\ \underline{63} \\ 2 \end{array}$$

4.  $3,996 \div 3 = 1,332$

5.  $228 \div 4 = 57$

6. Lily baked 295 cupcakes for the convention. If she can put 5 cupcakes in one box, how many boxes does Lily need?

59 boxes

7. Bob has 1,224 squares. There is an equal number of squares that are 6 different colors. How many squares are each color?

204 squares

8. Grandpa Joe has \$256. If he gives each of his 8 grandchildren the same amount of money, how much does each grandchild get?

\$32

9. There are 4 friends. They shared 36 pieces of pizza equally. How many pieces does each friend get?

9 pieces

10. The plant nursery grew 3,496 marigolds. If they sell the marigolds in packs of 4, how many packs of 4 can they sell?

874 packs
