OPPORTUNITY FOR YOUR TEEN

CTE Advantage:

- gain real-world skills in high school
- discover your strengths and passion
- transition well into college and/or a career

Whether it be in a CTE lab or using career skills in a local business setting, applied hands-on learning builds self-knowledge and confidence. CTE pathways offer ways for your teen to get involved, compete, and build leadership skills. Most pathways offer ways to earn college credits, industry certifications and/or engage in local externships and career exploration opportunities.

For more information check out the West Ada CTE video at www.westada.org/CTE
