Hello!

It’s the final week! Let’s see those houses!! If you haven’t already, this week is when you need to cut out your house and build it. If you want to, you can make 3D furniture, counters, etc. Some of you like to build, some like to draw, so make it your own! When you’re done please take a few pictures and send them to me. I’d love to see them.

As you head off into summer, please continue to stay creative. Keep cooking for your families, thinking about home design, and if you can...sew! Any creative project you can work on this summer will keep your brain active, and that’s really what your teachers want for you until we can see you again. If you were a 7th grader this year, I can’t wait until we see each other again back at Star Middle. If you were an 8th grader, please know that your teachers are wishing you well, and feel just as jipped as you do that we weren’t able to say goodbye in person.

Sending virtual hugs and high fives to all of you!!!!

Take care and stay safe!

Mrs Denton 😊
