## WELCOME BACK!

**MATH:** We started our Measurement unit! We have learned a lot about telling time, grams, kilograms, liters, and milliliters. We will be moving forward to using rulers and more measurement. Something I have noticed, a lot of the kids are confused about subtraction when we have to regroup. This is something we will continue to work on throughout this unit.

**ELA:** We have began working on quite a few grammar concepts. The kids have been really excited to learn about different concepts, you should ask them about some of the idioms they learned! That was a ton of fun. We have made a grading update in the district and our spelling words will now be included in their gradebook. Students' spelling test score will reflect the words as well as the sentences on the back.

**Science:** We are finishing our first science unit this week, our next one is all about plants and heredity of plants. This unit should be a lot of fun and I think kids will really enjoy the different things they learn in this unit. It will also be a perfect unit for Fall!

**Fall Activities:** The kids have been so excited with the weather changing, asking me daily if we get to have a Halloween party. In the class for Halloween and Christmas, I will do a number of seasonal activities and projects. With these extra projects, the cost adds up pretty quick for an entire class of students. I have attached a sign up genius with things we will need. If you can donate anything that would be greatly appreciated!

## IMPORTANT DATES

### COMING UP:

- No School Monday, October 7th.
- Conferences will be October 9th and 10th. Please bring your child with! Can't wait to see everyone!
- No School Friday, October 11th.
