

CHINA

1600 BCE - 1 CE

Physical Characteristics

Rivers:

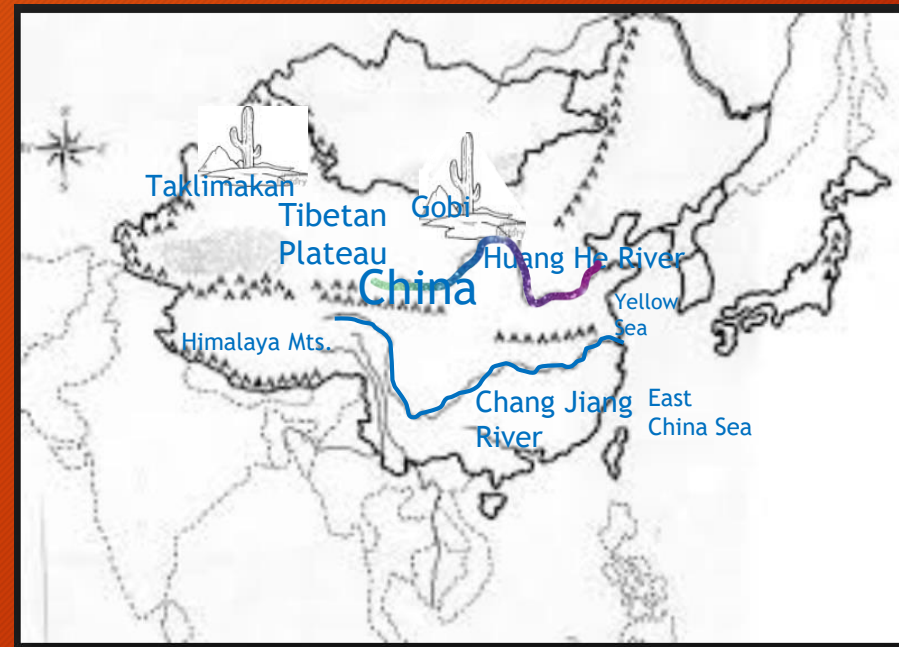

- Huang He (Yellow)
 - Mouth: end of river
Yellow Sea
- Chang Jiang (Yangtze)
 - Mouth: East China Sea
 - Source of Rivers: start of river
Tibetan Plateau

Deserts

- Gobi
- Taklimakan

Mountains:

- Himalaya

Effects of Geography

- Good Effects

agriculture : raising plants and animals

silt: rich mix of rock and soil

irrigation : system to control water

protection

- Bad Effect

Flooding

Geographically isolated:

separation of people/plants by physical characteristics

Limits growth

Hard to trade/travel

After taking notes about geography, add terms to your index

- Agriculture
- Chang Jiang River
- Geographic isolation
- Huang He River
- irrigation
- Mouth of river
- Silt
- Source of river
